SUMMARY

Computer Science student at ASU and US Citizen with hands-on experience in threat intelligence and log analysis via Sandia National Laboratories. Proficient in using Elastic SIEM and Azure Data Explorer to defend critical infrastructure. Seeking a Summer 2027 Cybersecurity internship to apply a proactive, inquiry-based 'auditor's mindset' to complex systems defense.

EDUCATION

B.S., Computer Science (Cybersecurity) GPA: 4.0

May 2029

Arizona State University, Tempe, AZ

Relevant Coursework: Object-Oriented Programming, Discrete Mathematics, C/C++ Programming, Digital Logic & Design, Assembly Language Programming, Data Structures & Algorithms, Calculus III, Computer Systems Engineering (TA)

TECHNICAL SKILLS

Cybersecurity & SIEM: Elastic (SIEM), Velociraptor, Azure Data Explorer, Cloudflare, VLANs

Programming & Scripting: C, C++, Java, Go, Bash, JavaScript, PowerShell, Python, TypeScript

IT Systems & Platforms: Google Workspace, UniFi / Ubiquiti, Blynk IoT, Windows, macOS, Linux, Jira, Raspberry Pi, ESP32, Tailscale, Parsec

PROJECTS

Tracer FIRE Cybersecurity Incident Response Training – Sandia National Laboratories

March 2026

- Performed threat intelligence and log analysis within a simulated Security Operations Center (SOC), utilizing Azure Data Explorer (ADX) and Elastic SIEM to reconstruct attacker paths and identify indicators of compromise (IOCs)
- Completed a CTF-style incident response exercise combining log analysis, anomaly detection, control gap identification, and structured incident documentation using audit-quality methodology.

Remote PC Power Management using IoT Platform – Personal Project

May 2026

- Architected a secure remote hardware management system using an ESP32, implementing a multi-layered authentication framework (**Blynk IoT, Parsec, and Tailscale VPN**) to ensure secure, zero-trust access control.
- Engineered the system to maintain encrypted, high-throughput remote management for hardware power states while securely bypassing restrictive network environments.

Cloud Email and Workspace Migration – Volunteer Project

February 2025

- Led a zero-downtime migration of **50+** users to Google Workspace, implementing **automated internal communication controls** to enforce organizational governance and youth protection policies.
- Developed comprehensive process documentation and managed access provisioning to ensure continuous compliance with internal policy and reduce recurring annual software expenses.

Home Network Infrastructure Upgrade – Personal Project

April 2025

- Diagnosed connectivity failures and architected a **Ubiquiti**-based network, configuring secure **VLAN**-segmented guest and internal networks to support **60 client devices**.
- Produced detailed network diagrams, access control documentation, and configuration baselines, reducing network outages from **50 to 1** per year.

EY Technology Risk Virtual Job Simulation – Ernst & Young

August 2026

- Completed a virtual job simulation covering common IT risks and processes within EY's Tech Risk team.
- Engaged in practical tasks to improve relationship-building, teamwork, productivity, and audit assessment skills.

WORK EXPERIENCE

Fairbrae Swim and Racquet Club: Senior Lifeguard (30 hours/week) - Sunnyvale, CA

May 2024 – August 2026

- Supervised and trained **28 lifeguards**, enforcing regulatory safety protocols, compliance standards, and emergency response procedures.
- Maintained chemical balance and filtration systems for a **300+ patron** facility, including daily compliance logging, operational checks, and stakeholder communication.
- Led two trainings for swim instructors and lifeguards to ensure compliance and reinforce skills and expectations.

ADDITIONAL INFORMATION

- Eagle Scout, Order of the Arrow — Vigil Honor, Founder's Award
