SUMMARY

Cybersecurity-focused Computer Science student with experience in incident response forensics, IT controls documentation, and change management seeking an IT and networking related internship.

EDUCATION

B.S., Computer Science (Cybersecurity) GPA: 4.0 May 2029
Arizona State University, Tempe, AZ

Relevant Coursework: Object-Oriented Programming, Discrete Mathematics, C/C++ Programming, Digital Logic & Design, Assembly Language Programming, Data Structures & Algorithms, Calculus III, Computer Systems Engineering (TA)

TECHNICAL SKILLS

Cybersecurity & SIEM: Elastic (SIEM), Velociraptor, Azure Data Explorer, Cloudflare, VLANs

Programming & Scripting: C, C++, Java, Go, Bash, JavaScript, PowerShell, Python, TypeScript

IT Systems & Platforms: Google Workspace, Unifi / Ubiquiti, Blynk IoT, Windows, macOS, Linux, Jira, Raspberry Pi, ESP32, Tailscale, Parsec

PROJECTS

Tracer FIRE Cybersecurity Incident Response Training – Sandia National Laboratories March 2026

- Conducted post-breach forensic analysis in a simulated SOC environment using **Elastic SIEM**, **Velociraptor**, **Malcom**, and **Microsoft Azure Data Explorer** to identify indicators of compromise, trace attacker activity, and document evidence for structured findings.
- Completed a CTF-style incident response exercise combining log analysis, anomaly detection, control gap identification, and structured incident documentation following audit-quality methodology.

Remote PC Power Management using IoT Platform – Personal Project May 2026

- Engineered an **ESP32** with **C++** and **Blynk IoT** cloud platform to enable remote start, restart, and shutdown of a PC from anywhere in the world.
- Integrated **Tailscale** and **Parsec** for high-speed remote access despite network restrictions.

Cloud Email and Workspace Migration – Volunteer Project February 2025

- Managed a zero-downtime change management migration of **50+ users** from a legacy email platform to **Google Workspace**.
- Developed process documentation, administered end-user support, and validated access provisioning, eliminating **\$200** in annual email fees.

Home Network Infrastructure Upgrade – Personal Project April 2025

- Diagnosed connectivity failures and architected a **Ubiquiti**-based network, configuring secure **VLAN**-segmented guest and internal networks to support **60 client devices**.
- Produced detailed network diagrams, access control documentation, and configuration baselines, reducing network outages from **50 to 1** per year.

AI-Powered Vision Assistance Prototype – Class Project August–November 2025

- Prototyped a real-time safety device using **Raspberry Pi**, sensors, camera, and audio alerts for visually impaired users with **25 millisecond** response time and **99% accuracy**.
- Leveraged AI-assisted development (**Gemini**, **GitHub Copilot**) to accelerate prototyping and identify and resolve **7 critical bugs** while maintaining clean, readable code.

WORK EXPERIENCE

Fairbrae Swim and Racquet Club, Sunnyvale, CA: Senior Lifeguard (30 hours/week) May 2024 – August 2026

- Supervised and trained **28 lifeguards**, enforcing regulatory safety protocols, compliance standards, and emergency response procedures.
- Maintained chemical balance and filtration systems for a **300+ patron** facility requiring daily compliance logging, operational checks, and communication with stakeholders.
- Led two trainings for swim instructors and lifeguards to ensure compliance and review skills and expectations.

ADDITIONAL INFORMATION

- Eagle Scout, Order of the Arrow — Vigil Honor, Founder's Award
